Introducing the SQL Anywhere Monitor
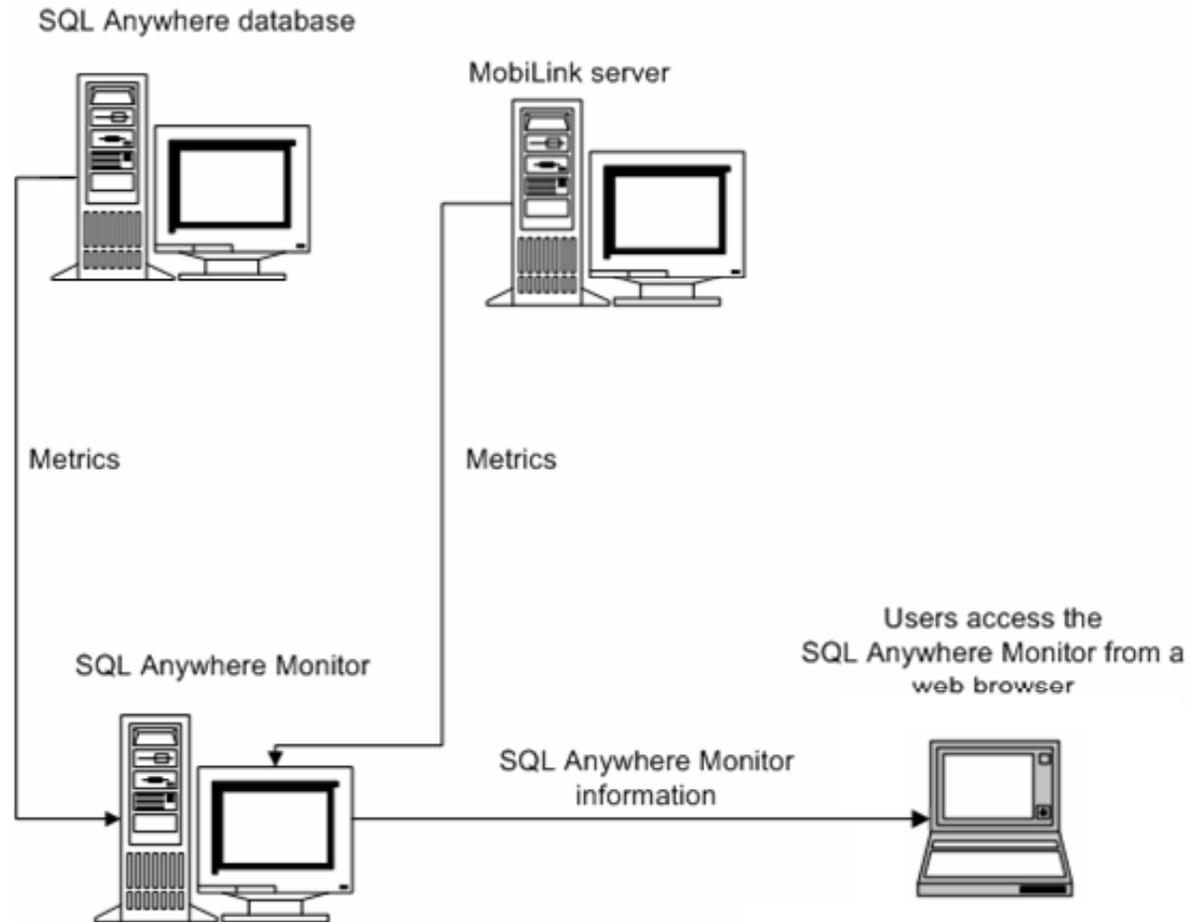

Eric Farrar

Product Manager

What is the SQL Anywhere Monitor?

- The SQL Anywhere Monitor is a browser-based administration tool that provides you with information about the health and availability of SQL Anywhere databases and MobiLink servers.

  - **Constant data collection**

  - **Email alert notification**

  - **Browser-based interface**

  - **Monitor multiple databases and MobiLink servers**

  - **Minimal performance impact**

- This tool is designed to show health and availability. For more detailed performance analysis and query optimization, use the Application Profiling Wizard

Monitor Architecture

SQL Anywhere database
